

Modern Divided Lights®

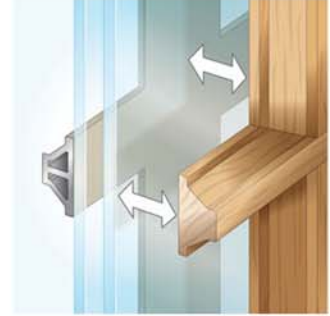

Modern Divided Lights offer an authentic divided light appearance by featuring fixed interior and exterior grilles with a spacer between glass panes.

Classic Divided Lights

Classic Divided Lights remove the internal spacer, offering a traditional and economical solution.

Removable Wood Grilles

Removable wood grilles are installed on the interior surface and are available with an optional wood surround. (Shown with optional fixed exterior grille.)

All divided light options are available in all wood species for both interiors and exteriors. Aluminum exteriors are available in our 50 Eagle Complimentary Colors™ and custom colors.

NOTES

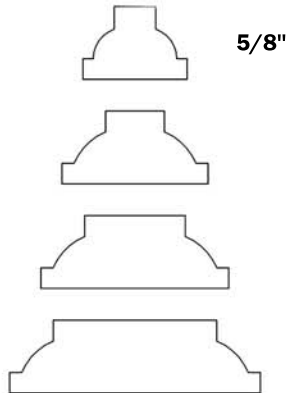

All divided light options are shown with a 3/4" aluminum exterior grille and 3/4" wood interior grille. Renderings are not to scale.

The divided light profiles and widths of Eagle Entraceways vary from other Eagle products. Use the diagrams below to specify the profile that best complements the divided light profiles of our other Eagle products.
