

# Replacement Sash Kits

## Replacement Sash Kit

Eagle® double-hung replacement sash kits are complete with window sashes, locking hardware and sash lifts, compression jamb liners and balance systems, sill dam, head parting stop and installation hardware. Each kit is built to your exact measurements.

The kits were designed to replace older sash with a new energy efficient sash without removing the trim and the window frame. The replacement sash will fit a double-hung jamb pocket of 3¼" or larger. Sash kits are also available in a picture window design. The sash depth is 1<sup>17</sup>/<sub>32</sub>".

Picture units consist of one sash and one sill dam.

## Sash

① Select wood components are kiln dried, and treated with water/insect repellent and preservative. Interior wood surfaces are available in complimentary pine or mixed grain fir, or optional wood species including cherry, hickory, African mahogany, maple, oak, walnut, alder or vertical grain fir. Interior surfaces are available unfinished or factory primed. Optional factory-applied finishes are available in a variety of stains and basecoats.

② Wood components are fitted with aluminum extrusions on the exterior. 50 Eagle Complimentary Colors™ that meet AAMA 2604 specifications are available, as well as custom colors. Also available is a selection of seven exterior anodized options.

## Glazing

③ High-Performance™ Low-E4® glass with a low-conductance spacer. Tinted, clear IG, high-altitude glass and other special glazing options are available.

④ Glass is fixed in place from the interior with wood stops that can be removed for easy reglazing if necessary. Glass stops available in colonial and contemporary profiles.

## Weather Strip

⑤ The replacement sash kit utilizes a foam weather strip on the bottom of the lower sash that forms a weather-tight seal against the sill dam when closed.

⑥ Hollow bulb weatherstripping forms a compression seal at the check rails and at the head.

### Hardware

7 Sash kits under 36" in width will receive one lock and one sash lift. Units 36" to 48" in width will receive two locks and two sash lifts. Units 48" and wider will require three locks and two sash lifts. Finishes are available in bronze, black, white, gold and polished brass.

### Jamb Liner & Balance System

Each sash kit utilizes a two-piece foam-backed jamb liner and a block and tackle balance system. The sashes tilt inward for easy cleaning. Beige or white jamb liners are available and are cut to the sill slope specified at time of order.

### 8 Insect Screens

Charcoal fiberglass screen mesh fits into an aluminum frame in all 50 Eagle Complimentary Colors™ and seven anodized finishes. Available in half or

full insect screens. Aluminum screen mesh is available as an option.

TruScene® insect screens available in all 50 Eagle Complimentary Colors and seven anodized finishes.

### 9 Divided Lights

**Modern Divided Lights.** Fixed interior and exterior grilles with internal spacers between two panes of glass. Available in 5/8", 7/8", 1 1/8", 1 1/2" or 2 1/4" widths and colonial or contemporary profiles.

**Classic Divided Lights.** Fixed exterior and interior grilles without an internal spacer. Available in 5/8", 7/8", 1 1/8", 1 1/2" or 2 1/4" widths and colonial or contemporary profiles.

**Between-glass grilles.** Available in 5/8" flat or 1" contoured aluminum profiles. Two-tone colors of colony white/pebble

tan, colony white/sierra bronze or colony white/forest green are available on the 1" profile.

**Removable wood grilles.** Removable wood grilles are available in a 7/8" width and colonial or contemporary profiles. Optional surround and fixed exterior grilles also available.
